

## ENERCO

### Snowbrush K-125

The brushing device is meant for fast and efficient cleaning of rails, switches, rail yards and platforms from snow. Enerco K-125 is attached by quick coupling to the rototilt of the excavator. The power is taken from the excavator hydraulics. The width of the brushes can be tailor made. The lath brushes can be changed quickly and easy. Optionally equipped with a scraper for ice and hard snow.

#### TECHNICAL DATA:

- Brushing width 2550 mm
- Weight 1350 kg
- Power 60-95 kW
- Oil flow 140-200 l/min
- Oil pressure max. 300 bar
- Transmission with chain from hydraulic motor to the brush drum end
- Lath type brushes
- Support legs for standing times

Konepaja Mankinen Oy offers an extensive range of technical attachments for excavators, including snowbrushes, ballast tampers, sleeper changing units and other rail track maintenance equipment. We can provide with technical solutions like installing excavator railway wheel sets and rail worthiness inspections. All the products have CE certification and manufactured according to European standards.
