

# ENERCO KT-30

## Rail gap adjuster

Enerco KT-30 is hydraulically operated double acting rail gap adjuster. Pulling and pushing power is 30 kN. The device grabs hydraulically from the side of the rail head and after that, the rail ends can either be pulled or pushed to the demanded distance (max. 100 mm). It leaves the rest of the rail free for working when e.g. insulated joint can easily be mounted or repaired while the device is grabbed on the rail. It is also released hydraulically from the rail. The device is equipped with wheels, hydraulic hand pump and pressure relief valve.

### TECHNICAL DATA:

- Length 1500 mm
- Width 750 mm
- Height 530 mm
- Weight 130 kg

Konepaja Mankinen Oy offers an extensive range of technical attachments for excavators, including snowbrushes, ballast tampers, sleeper changing units and other rail track maintenance equipment. We can provide with technical solutions like installing excavator railway wheel sets and rail worthiness inspections. All the products have CE certification and manufactured according to European standards.
