

ENERCO RT-10

Tamping device

The Enerco RT-10 is a light hydraulically-operated 4 tool tamping device for railway lines. The excavator must be equipped with a rototilt. This enables tamping the rails and tamping aside of the line. The device is designed for normal lines, joints and switches light tamping. There is a mechanical tamping depth adjustment.

TECHNICAL DATA:

- Length 1300 mm
- Width 600 mm
- Height 1200 mm
- Weight 730 kg
- Hydraulic motor: oil flow 63 l/min; working pressure max. 420 bar
- Hydraulic cylinders: oil flow 30-90 l/min; working pressure max. 280 bar

Konepaja Mankinen Oy offers an extensive range of technical attachments for excavators, including snowbrushes, ballast tampers, sleeper changing units and other rail track maintenance equipment. We can provide with technical solutions like installing excavator railway wheel sets and rail worthiness inspections. All the products have CE certification and manufactured according to European standards.
